Bryant offers a comprehensive family of 13-21 SEER air conditioners and the environmentally sound Puron® refrigerant.

**PRECISION COMFORT CONTROL**

Our Evolution® Connex™ control allows for precise temperature and humidity control. "Intelligent" circuitry with full 7-day programmability monitors operation and automatically adjusts system settings to maximize comfort and efficiency.

**FURNACE**

Provides reliable, high-efficiency heating for long-lasting comfort and energy savings. Available in high-efficiency gas- and oil-based fuel sources.

**EVAPORATOR COIL**

Allows the refrigerant to absorb heat from the air as it passes over the coil surface. The evaporator coil is located with the indoor unit and is also referred to as the indoor coil.

**HUMIDIFIER**

Replenishes moisture to dry air.

**AIR PURIFIER**

Improves air quality by removing potentially harmful and irritating airborne pollutants from your home.

**ULTRAVIOLET GERMICIDAL LAMP**

Helps prevent growth and buildup of contaminants on your indoor coil to maximize efficiency and leave your indoor air cleaner less polluted.

**FRESH AIR VENTILATOR**

Combines fresh outdoor air with conditioned indoor air for improved air quality and maximum efficiency—great for today’s tightly constructed homes.

**ZONING**

Sets different temperatures for up to eight different areas of your home for truly customized comfort and enhanced utility savings.

Before purchasing this appliance, please read the important energy cost and efficiency information available from your dealer.

Manufacturer reserves the right to discontinue, or change, at any time, specifications or designs without notice and without incurring obligations.
Bryant Does Whatever It Takes to Protect the Air You Breathe.

A Tradition of Setting Standards

Did you know that indoor air can be as much as five times more polluted than outdoor air? In fact, viruses, bacteria, mold spores, pollen and other irritants can circulate throughout the air in your home. Let Bryant Perfect Home Solutions come to your rescue with a collection of indoor air purification and filtration products that effectively remove and control these potentially harmful airborne pollutants.

High-Efficiency Air Purification

The Perfect Way to Clear the Air

Bryant’s Perfect Air™ Purifier and Preferred™ Series Air Purifier treat your comfort system using a unique three-step process. Here’s how it works:

Step 1:
- The Perfect Air Purifier and Preferred Series Air Purifier provide extremely high airflow efficiency and patented germicidal technology so effective they sterilize coil surfaces to maximize air filtration efficiency and patented germicidal technology so effective they sterilize coil surfaces to maximize efficiency and release potentially harmful pollutants.

Step 2:
- Bryant UV lamps are designed to bathe your cooling coil with intense UV-C light. These lamps help to maintain system efficiency and protect the air you breathe. For your convenience, no cleaning is required – just replace the lamps once a year.

Step 3:
- Bryant UV lights provide maximum effectiveness when extended outside your system near the cooling coil where pollutants can collect. Simply replace the lamps once a year to enjoy the benefits of enhanced indoor air quality.

How Does it Work?

To truly get the most out of your Perfect Air™ Purifier and Preferred™ Series Air Purifier, make sure to maintain your comfort system using a unique three-step process. Here’s how it works:

Step 1:
- The Perfect Air Purifier and Preferred Series Air Purifier are specifically designed to change particles as they enter the purifier.

Step 2:
- A specially designed, continuously charged media captures airborne particles.

Step 3:
- Polished, state-of-the-art technology kills captured viruses, bacteria, mold spores and other allergens.

Ultraviolet Germicidal Lamps (UV Lights)

Bryant UV lights provide maximum effectiveness when extended outside your system near the cooling coil where pollutants can collect. Simply replace the lamps once a year to enjoy the benefits of enhanced indoor air quality.

Fresh Air Ventilators

Today’s homes are built to conserve energy, with tighter construction and better insulation. Unfortunately, this air tightness means your hom e can also trap pollutants and other irritants to circulate in the air that you breathe.

Media Cabinets and Filters

As a part of your home comfort system, a Bryant Media Cabinet and Cartridge filter can help maintain proper humidity levels while trapping smoke, dust, pollen and other irritants in your living areas. The EZ Flex™ filter system is designed to allow maximum airflow while as new air builds up on the filter. Continued optimum performance is as simple and convenient as removing and replacing the disposable media filter once a year.

Humidifiers and Dehumidifiers

When it’s hot and sticky outside, your air conditioner or heat pump can work overtime. This often causes indoor humidity levels to creep upward, making your room and your family uncomfortable. Bryant® whole-home humidifiers and dehumidifiers can help ease these conditions. Bryant humidifiers can also help you save money on your energy bills, since humidification actually costs less than dry air – your air control can be set to a lower temperature.

Media Filters

An economical alternative to the Perfect Air™ Purifier and Preferred™ Series Air Purifier, the EZ Filter™ filter system can help extend the life of your system’s components while improving overall system performance. The EZ Filter™ filter system is designed to allow maximum airflow while as new air builds up on the filter. Continued optimum performance is as simple and convenient as removing and replacing the disposable media filter once a year.

FILCAB

Today’s homes are built to conserve energy, with tighter construction and better insulation. Unfortunately, this air tightness means your home can also trap pollutants and other irritants to circulate in the air that you breathe.

Bryant Does Whatever It Takes to Protect the Air You Breathe.

Did you know that indoor air can be as much as five times more polluted than outdoor air? In fact, viruses, bacteria, mold spores, pollen and other allergens can circulate throughout the air in your home.

Let Bryant Perfect Home Solutions come to your rescue with a collection of indoor air purification and filtration products that effectively remove and kill these potentially harmful airborne pollutants.

The Evolution® System

Perfect Home Solutions products include:

- Air Purifiers
- Ultraviolet Germicidal Lamps (UV Lights)
- Media Filters
- Fresh Air Ventilators
- Humidifiers & Dehumidifiers
- Filtering Systems
- The EZ Flex® Systems

How Does It Work?

Today’s homes are built to conserve energy, with tighter construction and better insulation. Unfortunately, that means your home can also be a breeding ground for viruses, bacteria, mold spores and other allergens.

Step 1:

The Perfect Air Purifier and Preferred Series Air Purifier treat comfort systems using a unique three-step process. Here’s how it works:

Step 1: A specially designed, permanently charged media captures airborne particles.

Step 2: Polished, state-of-the-art technology kills captured viruses, bacteria, mold spores and other allergens.

Step 3: Purifier use precision point ionization to charge media captures airborne particles. Patented, state-of-the-art technology kills captured viruses, bacteria, mold spores and other allergens.

Ultraviolet Germicidal Lamps (UV Lights)

Bryant UV lamps are designed to bathe your cooling coil w ith intense UV-C light. These lamps use ultraviolet germicidal technology so effective they sterilize coil surfaces to maximize system efficiency and protect the air you breathe. For your convenience, no cleaning is required – just replace the lamps once a year.

Bryant UV lights provide maximum effectiveness when mounted inside your system near the cooling coil where pollutants can collect. Simply replace the lamps once a year to enjoy the benefits of enhanced indoor air quality.

Step 2:

Bryant’s filter cabinet and cartridge filter. A third option for the budget-minded consumer is Bryant’s EZ Flex® filter system. This economical alternative to the Perfect Air™ Purifier and Preferred™ Series Air Purifier, the EZ Flex™ filter system can replace old and used buildup on your system’s components while improving overall airflow and comfort. And, EZ Flex™ filters are disposable media filters once a year.EZFlex™ filter system can replace old and used buildup on your system’s components while improving overall airflow and comfort. And, EZ Flex™ filters are disposable media filters once a year.

Humidifiers and Dehumidifiers

Overly dry air can cause itchy, cracked skin, dry nose passages, static shocks, and cracked woodwork. Adding a Bryant humidifier can help alleviate these conditions.

In addition, proper levels of humidity can reduce new-opportunity for dust and other irritants to circulate in the air you breathe.

Bryant humidifiers can help you keep your money on your energy bills, since humidification actually lessens wear and tear air – your air control can be set to a lower temperature.

Today’s homes are built to conserve energy, with tighter construction and better insulation. Unfortunately, that means your home can also be a breeding ground for viruses, bacteria, mold spores and other allergens.

A inexpensive alternative to the Perfect Air™ Purifier and Preferred™ Series Air Purifier is the EZ Flex™ filter system. This economical alternative to the Perfect Air™ Purifier and Preferred™ Series Air Purifier, the EZ Flex™ filter system can replace old and used buildup on your system’s components while improving overall airflow and comfort. And, EZ Flex™ filters are disposable media filters once a year.

A combination of unobtrusive humidification and dehumidification, the EZ Flex™ filter system can replace old and used buildup on your system’s components while improving overall airflow and comfort. And, EZ Flex™ filters are disposable media filters once a year.

Media Cabinets and Filters

Today’s homes are built to conserve energy, with tighter construction and better insulation. Unfortunately, that means your home can also be a breeding ground for viruses, bacteria, mold spores and other allergens.

As part of your home comfort system, a Bryant fresh air ventilator can refresh and ventilate indoor air, removing unseen pollutants while maintaining system efficiency. It’s as if you opened your windows and let the fresh air in without losing your heating or cooling comfort.

Fresh Air Ventilators

Bryant humidifiers can help you keep your money on your energy bills, since humidification actually lessens wear and tear air – your air control can be set to a lower temperature.
Bryant Does Whatever It Takes to Protect the Air You Breathe.

A Tradition of Setting Standards

Truly a whole-home solution, the Perfect Air™ Purifier and Preferred™ Series Air Purifier provide extremely high air filtration efficiency and patented germicidal technology so effective they couldn’t be easier to use because there’s no cleaning required - just replace the lamps once a year to enjoy the benefits of enhanced indoor air quality.

How Does it Work?

Bryant’s Perfect Air™ Purifier and Preferred™ Series Air Purifier traps viruses, bacteria, mold spores, pollen and animal dander from your entire home, creating cleaner, fresher air.

Step 1: The Perfect Air Purifier and Preferred Series Air Purifier

The Perfect Air Purifier and Preferred Series Air Purifier traps viruses, bacteria, mold spores, pollen and animal dander from your entire home, creating cleaner, fresher air.

Step 2: A specially designed, continuously charged media captures airborne particles.

The Perfect Air Purifier and Preferred Series Air Purifier uses an emission process to charge particles as they enter the purifier.

Step 3: Potentially, static electricity kills captured viruses, bacteria, mold spores and other allergens.

The electrically charged media removes airborne particles.

The High-Efficiency Core transfers heating or cooling energy from exiting stale indoor air to the incoming outdoor air. The air streams do not mix, yet you maintain more comfort than with conventional systems because the fresh air ventilator eliminates the need for heat loss or gain.

AERCO

• Air Purifiers
• 10000-watt lamps
• Fresh air ventilators
• Humidifiers & Dehumidifiers
• Media Filters
• The Evolved™ Systems

Perfect Home Solutions products include:

• Ultraviolet Germicidal Lamps (UV Lights)
• Fresh Air Ventilators
• Media Filters
• The Evolved™ Systems

Mold and bacteria can grow on the surface of your cooling coil. As a part of your home comfort system, a Bryant Air Purifier system can reduce dirt and dust buildup on your system’s components while improving indoor air quality and comfort simultaneously.

Today’s homes are built to conserve energy, with tighter construction and better insulation. Unfortunately, that means your home can retain heat and recirculate airborne particles, gases, unpleasant odors and contaminants that irritate your eyes, lungs, and skin.

As Bryant’s filter cabinet and cartridge filter.

Media Cabinets and Filters

An economical alternative to the Perfect Air™ Purifier and Preferred™ Series Air Purifier, the EZ Flex™ filter system can replace old and outdated ventilation on your system’s components while improving indoor air quality and comfort simultaneously.

A third option for the budget-minded consumer is Bryant’s filter cabinet and cartridge filter.

EZ Cab

Humidifiers and Dehumidifiers

When it’s hot and sticky outside, your air conditioner or heat pump can work overtime. This often causes indoor humidity levels to creep upward, making you and your family uncomfortable. A Bryant® whole-home dehumidifier can slow access moisture from cool indoor air, enhancing your comfort. Offered in a variety of installation options ranging from basement, closet, attic, crawl space, or standalone, your dealer can assist you with the best combination of unobtrusive design and convenience.

A third option for the budget-minded consumer is Bryant’s filter cabinet and cartridge filter.

Although economically priced, it’s far superior to today’s 1” disposable filters, in both filtration efficiencies to meet the needs of various homes.

Unknown to most homeowners is that just 5% of the indoor air they breathe is fresh. The remaining 95% is recirculated and contains dust, dirt, pollen and other allergens. The EZ Flex™ filter system can replace old and dated ventilation on your system’s components while improving indoor air quality and comfort simultaneously.

A third option for the budget-minded consumer is Bryant’s filter cabinet and cartridge filter.

The Evolution of Comfort
Bryant is at the forefront of a comfort revolution with its exclusive Evolution® System. Starting with the sleek, dependable Evolution® Connex™ control, that offers unmatched ease of use and operation of your indoor air quality products from one convenient location.

A Bryant Evolution System also delivers superior air cleaning capabilities. A nearly continuous flow of air through your comfort system virtually ensures that your air is constantly being cleaned. The new SureSaver air filter detection enhances indoor air quality and system efficiency by letting you know exactly when it’s time to clean or replace your filter. And, with our Perfect Humidity® feature, you’ll enjoy precise humidity control during the cooling and heating seasons.

Simple, stylish and powerful, the Evolution® System truly sets a new standard for excellence in home comfort and indoor air quality.
